FSS BLAZE™ STUDIO

Blaze Studio transforms complex solution development into an intuitive, visual, and highly automated experience. From domain modeling to UI generation, it enables rapid concept-to-deployment with minimal manual effort.

Low Code Development for Rapid Innovation

Why BLAZE Studio

RAPID CONCEPT TO DEPLOYMENT

Transform ideas into fully deployable solutions quickly, accelerating delivery while minimizing effort.

DRAG-AND-DROP DESIGN

Visually build application logic, UI with ease, eliminating complexity and speeding up development.

INTEGRATED CODE EDITOR

Empowers power users to extend and refine logic seamlessly, blending low-code convenience with full-code flexibility.

AI-POWERED CO-CREATION

Generate complex business logic intelligently with AI, accelerating development and reducing manual effort.

Key Highlights

- Future-ready platform accelerating product launch cycles.
- Flexible visual design enabling faster innovation.
- AI-driven business logic that boosts efficiency and reduces costs.
- Unified low-code and pro-code experience for seamless delivery.
- Real-time collaboration that drives organizational agility.
- One-click deployment ensuring rapid, reliable releases.
- Deploy applications instantly with a single click, streamlining releases and reducing operational effort.
- Enable teams to work together in real time, ensuring seamless coordination and faster decision-making.
